Global Sourcing Solutions for Engineered Components

WELCOME

Mechanical Power is a 45 year-old supply chain company that takes the hassle out of global sourcing for OEM and Distribution customers.

Our resources and expertise always drive meaningful value for customer partners. More than your typical distributor, we consider ourselves a hybrid manufacturer ensuring your organization the highest outputs in the forms of Quality, Delivery and Total Cost of Ownership.

Mechanical Power saves customers time, money and difficulty by navigating the delicacy of competitively sourcing engineered components. We'll be an extension of your Supply Chain, Engineering and Quality functions with continuous improvement top of mind.

ABOUT US

Jim Dorn founded Mechanical Components in 1976 distributing mechanical components and fasteners to his customers. Today, Mechanical Power is a leading organization in product sourcing to solve diverse customer needs. We will be an extension of your Supply Chain, Engineering and Quality functions.

More than just your typical distributor, we are best known for saving customers time and money by navigating the delicate balance of managing inventory requirements, precision quality and competitive total costs of ownership.

Our distribution facility and headquarters are ISO90001:2015 certified and are engrained with visual management, *Kaizen* and continuous improvement principles. Our manufacturing partners have at least ISO9001:2015 accreditations, however we put strong emphasis in our key manufacturing partners being TS/IATF certified.

OUR MISSION

The Mission of Mechanical Power, Inc. is to be the best-in-class supplier of bearings, sprockets, chain and related industrial products. Total Customer Satisfaction is the basis for MPI's founding more than 40 years ago and remains our number one priority.

MPI sources the highest-quality products at competitive prices from around the world and provides just-in-time inventory-management services for our customers. MPI is proud of the longevity of our customer base and employees, who are dedicated to serving the customer.

SERVICES AND SOLUTIONS

Global Sourcing

Our globally competitive manufacturing partners are equipped to meet your requirements. We also have boots on the ground abroad to help manage our base.

Let Mechanical Power act as an extension of your supply chain to help you minimize waste, consolidate the supply base and enhance value for you in Quality, Delivery and Cost

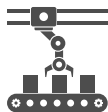

Consolidate Your Supply Base

Buying from too many people? Have Quality issues or OTD issues? Consolidate spend with MPower, minimize variation, reduce overall TCO and lean on us as your global sourcing partner who has what you need when you need it. Between our US team and boots on the ground abroad, we have you covered.

Inventory/Logistics Management

In modern times, global trade is no picnic. Reduce hassles and let MPower handle the ins and outs of import/export activity, inventory handling, carrying costs, navigating geopolitical headwinds and complex global relationships in a competitive space.

Kitting & Assembly

MPower is equipped to handle value add secondary operations in house that minimize customer touches. We are nimble and flexible positioning us to meet very specific customer needs across several competitive industries.

In-House Engineering & Design

We work with OEM product development teams early in the NPI process. MPower has an experienced engineering team focused on customer needs and creatively solves problems in custom applications. Let our engineering team provide a creative solution and give you an edge over the competition.

Ease of Doing Business

MPower values enjoyable, collaborative business partnerships. We are easy to do business with and are committed to having meaningful, cross-functional relationships with our customers. We live once and spend a lot of our lives working so let's enjoy it together!
